

GOSPEL GREEN

THE ORIGINAL CYDER

What is Gospel Green?

Gospel Green is a delicious and sophisticated sparkling Cider produced using the 'Champagne Method'. Providing the perfect alternative to Champagne, Prosecco and Cava. What's more we only use 100% apple juice in our artisan ciders.

How is Gospel Green made?

At Gospel Green we produce 'traditional method' cyder using only the finest apples hand selected, hand picked, from the Blackmoor Estate.

Gospel Green Cyder is crafted using the 'traditional method' as employed in the champagne region of France. This technique sees 4 months fermentation in vats followed by a minimum of 10 months in the bottle. Once secondary fermentation is complete, the bottles are disgorged and a 'dosage' is added developing the 'Brut' taste. Following the 'dosage' process all bottles are corked, wired, labelled and readied for sale. On the rare occasion that the apple harvest is exceptional, we produce an 'Ultra Brut'.

What does Gospel Green taste like?

We currently have two different ciders in the Gospel Green family:

2016 Brut: Aromatics of elderflower, brioche and green apples. Crisp with a light acidity and a slight earthiness coming through on the palate. Smooth with a rounded finish and a long lasting mousse.

2017 Rosé: A touch of Pinot Noir creates aromatics of wild strawberry and hedgerow berries with a hint of floral rosehip. This delicate sparkling rosé has a smooth rounded finish with a touch of baked apple.

What is the ABV and Calorific content of Gospel Green?

Both the Brut and Rosé are 8.4% vol
The Brut contains 80 Calories 125ml Serving

What ingredients are used when producing Gospel Green?

Gospel Green is made using 100% apple juice from English cooking and dessert apples.

Gluten Free / Vegan

How does my online order get processed?

We are thrilled to be working with Red.h and their team to fulfil all online orders, please check their website for full information and terms and conditions:
